# Your Resume in Three Different Styles

---

- Decorate your resume from the last session using external CSS. You are supposed to use the same HTML document except the included CSS file.
- Make two different styles by yourself. Try to make the resumes look as different as possible.
- For the third one, please search and use a styling CSS file from the web. You can easily find good CSS files shared by other designers in the world.
  - At the end of the resume, include a short report describing the CSS file from the web. The report should include the original location of the CSS file, how it changes your document, and any tips/techniques you learn from it.
- You are required to complete the practice within the class.
- Once you are done, please ask the lecturer or TA to check your practice, and submit Assignments and Test in blackboard.
