Memory Card Game

- The memory card game is a card game in which all of the cards are laid face down on a surface and two cards are flipped face up over each turn. The object of the game is to turn over pairs of matching cards. See the below for the details.
 - [https://en.wikipedia.org/wiki/Concentration_\(game\)](https://en.wikipedia.org/wiki/Concentration_(game))
- Please make a memory card game with Javascript. The card should be flipped by a mouse click. Use 5 or more card pairs. The program should count the number of trials.
- Optional tasks for bonus points.
 - Obtaining user input for the number of card pairs when a game starts.
 - Two players mode. The program should count each player's trails and declare the winner at the end of the game.
- You are required to complete the practice within the class.
- Once you are done, please ask the lecturer or TA to check your practice, and submit Assignments and Test in blackboard.
